GREECE'S RECOVERY AND RESILIENCE PLAN

#NEXTGENEU | FEBRUARY 2024

KEY FIGURES

EUR 18.2 billion
in grants
8.8% of GDP¹

EUR 17.7 billion
in loans

>41% value
of **payments requested**
corresponding to
23% of milestones/targets

Climate Target
38%

Digital Target
22%

Social Spending
18%²

WHAT ARE THE MAIN CHARACTERISTICS OF THE GREEK PLAN?

GREEN

EUR 13.6 billion dedicated to green objectives. A step-change for Greece to move forward with its green transition.

TRANSFORMATIVE

Modernising and digitalising public services and the Greek economy.

FAIR

Helping vulnerable groups get access to the labour market, modernising healthcare, promoting quality and inclusive education and training.

¹ Based on GDP in current prices for 2021.

² Data is based on the methodology for reporting social expenditure for the Recovery and Resilience Scoreboard ([Delegated Regulation 2021/2105](#)) and reflect the Member State's original national recovery and resilience plan (Plan). In the context of the revision of Member States' plans, the share of social expenditure might be subject to change.

HOW DOES THE GREEK PLAN HELP CITIZENS?

It helps improve people’s **quality of life** by supporting the **energy-efficient renovation of homes**, modernising **public and social services** and helping workers find jobs by providing **upskilling/ reskilling training** to employed and unemployed persons.

FLAGSHIP EXAMPLES

Investments to reduce energy costs for households and secure clean electricity supply

Greece has an outdated building stock and needs to invest in its modernisation, as well as in renewables, energy interconnections and storage to allow for more green electricity in all parts of Greece. Through the Plan:

- ▶ **116,500 residences will be renovated, with a focus on energy-poor households**, leading to significant energy savings;
- ▶ **Electricity interconnection will connect the Cyclades Islands to Greece’s grid** and help to retire obsolete oil-fired power plants.

Promote job creation and social inclusion

The Plan includes measures to boost employability and social inclusion of the most vulnerable:

- ▶ **Training programmes in highly demanded digital and green fields for more than half a million** unemployed and employed persons;
- ▶ **Hiring subsidies** for private sector companies for recruiting full-time more than 67,000 unemployed persons with a focus on the most vulnerable (long-term unemployed, persons with disabilities, refugees, Roma).

HOW DOES THE GREEK PLAN HELP BUSINESSES?

It tackles key challenges for businesses' competitiveness, by **improving access to financing** and **the business environment**, and **supporting SMEs**.

FLAGSHIP EXAMPLES

Support private investments and business environment

The Plan includes support to facilitate access to finance for private businesses and reforms to make doing business easier in Greece:

- ▶ **€17.7 billion in loans will help businesses to invest more**, with a significant part of these funds supporting the green transition and improving digital technologies;
- ▶ The completion of the land registry and improvements in the regulatory environment for companies will strengthen **legal certainty**;
- ▶ **User-friendly digital services** for conducting business will render the public administration more efficient and accessible.

Digitalisation of SMEs

99.9% of businesses in Greece are SMEs. To improve their ability to modernise and compete in international markets, the Plan contains:

- ▶ **Financial support schemes** to benefit 100,000 SMEs for the adoption of digital technologies and support the purchase of digital services;
- ▶ **Tax incentives** for SMEs to invest in digital and green technologies, and to become more export-oriented.

HOW DOES THE GREEK PLAN STRENGTHEN OUR UNION?

It helps to level the playing field in **taxation** and build **stronger institutions**, and increases the **Union's electricity supply**.

FLAGSHIP EXAMPLES

Enhanced efficiency and transparency of public administration and justice

Speed and transparency of the judicial system and the public administration are essential for economic development and the functioning of the EU's single market. The Plan includes measures that:

- ▶ **Increase the effectiveness and efficiency of judicial processes** through a reorganisation of the distribution of courts across Greece's territory and the establishment of a judicial police to support the operation of courts;
- ▶ **Improve the governance of public administration** by setting up an internal control system and a national network of integrity advisors across the public administration, including municipalities.

Strengthening of energy supply by renewables in the interest of the region

The Plan contains measures to exploit the significant and yet untapped potential for renewable energy production, which will allow Greece to become a green energy supplier to the Union:

- ▶ **Greece's renewable energy production capacity will be boosted** by adding 3 GW to green electricity supply through a variety of supportive reforms and investments;
- ▶ **A new legal framework will allow for large investments in offshore wind parks** to take place, enabling Greece to reach its target (1.9 GW by 2030) as set out in its National Energy and Climate Plan;
- ▶ This will contribute to the security of supply in the region of South-Eastern Europe.
